Blended Workforce IT Solutions

Our network architects support your IT environment and upskill your in-house network engineer as though they were our own. All for the cost of one senior in-house network architect.

Effective IT teams include both on-site smart hands network engineers (skilled in physical tasks and maintenance) *and* advanced network architects. Many organizations find it challenging to achieve this balance. If you don't have a robust in-house network team but still require advanced capabilities and cutting-edge tools, our blended workforce solution is the answer.

Expertise & Access: Our team of multi-skilled network architects become familiar with your specific network environment. We'll work with you—directly and in partnership with your in-house network engineer—to accomplish your organization's advanced network goals.

Collaboration: Your in-house network engineer will be part of a large, successful engineering team—they won't be isolated or adrift. Our engagement team will connect with you weekly to ensure satisfaction and alignment.

Value & Cost Optimization: Your organization can accomplish advanced network activities that wouldn't be possible otherwise. You're not constrained and technically influenced by the knowledge and skills of a less experienced team. You can adapt quickly to organizational needs and technology changes.

Technical Leadership: We'll provide the technical leadership for your in-house engineer, including hiring support and performance feedback. Regular communications ensures that we're all aware and informed.

Learning & Development: Your in-house network engineer becomes an extension of Threadfin; their capabilities accelerate. Through exposure to diverse skills, they'll learn advanced technologies, methods and best practices.

Loyalty & Engagement: Your in-house network engineer is on-site, ingrained in your culture, loyal to your team and committed to your organization's success. Closely aligned with your needs, they'll handle day-to-day network tasks, provide internal support and lead basic projects.

Collaboration is our north star.

From the moment we engage, we're laser-focused on your success. Our unique approach integrates our delivery team early and often to ensure we're unified in the vision. Our project management and customer success teams ensure we don't miss a beat and that all stakeholders are always in the loop.
