

Is your organization ready to move to the cloud?

Successful cloud migration requires meticulous planning. Before any work can take place, your infrastructures' migration readiness must be determined and a strategy must be created. Our cloud migration planning does just that. We also provide an estimated total cost of ownership (TCO).

1 Cloud Feasibility Assessment

We work with business stakeholders to identify:

Business initiatives

- ongoing projects
- future growth
- current and future budgets
- redundant vendor/systems

Licensing

- software/hardware lifecycles
- renewal periods
- active SLAs
- datacenter and other contracts
- BCDR requirements

Security, legal and compliance

- network, user and intellectual property regulations
- business operational requirements

2 Cloud Migration Readiness Discovery

Infrastructure and workloads

- health
- provisioning
- utilization
- license dependencies

Regulatory compliance

- workload
- user access dependencies

Security posture

3 Strategic Cloud Migration Deliverable

Migration Plan

We'll outline which infrastructures:

- take priority in the migration
- require more time/effort
- are better suited for retirement

Phased Migration Plan

- Our approach ensures no operational interruptions.

Security and ransomware prevention

Delivery excellence is our heart.

With a national footprint and global delivery, Threadfin has provided delivery excellence for 20 years. We leverage our Microsoft and AWS partnerships to achieve business outcomes.

Through each technology shift, we maintain our position as trusted digital transformation experts and advisors.
