Microsoft Power Apps

We help organizations leverage Microsoft Power Apps effectively. Our approachable experts always tailor their approach to your specific needs and goals.

assessment & strategy

We assess your organizational needs, existing systems and business processes to identify areas where Power Apps can provide value. From there, we develop an implementation strategy that defines objectives and scope, as well as a roadmap for implementation.

app development

We design and build custom Power Apps, tailoring things like layout, functionality and user interface to your organization's unique requirements. Among other things, these apps can automate workflows, streamline processes and improve productivity.

app integration

Integrating Power Apps with other Microsoft and third-party applications is the key to a seamless user experience. We integrate Power Apps with SharePoint, Microsoft 365, Dynamics 365 and more.

migration & management

Migrating data, whether that's from legacy systems to Power Apps or from one tenant to another, can be complex. We plan and execute migration strategies that ensure integrity and security.

scaling & expansion

As your organization grows, you may need to scale and expand your Power Apps solutions. We plan for scalability and implement solutions that accommodate growth.

governance & best practices

Effective governance and best practices for development and use helps maintain consistency and control. We can assist in defining and implementing these governance frameworks.

security & compliance

Data security and compliance with industry regulations is a top priority. We configure security settings, implement role-based access controls and ensure compliance with GDPR, HIPAA or other relevant standards.

training & adoption

User adoption is critical for successful initiatives. We provide training that helps users understand and use the Power Apps platform.

support & maintenance

Post-implementation support and maintenance services are available to address issues, apply updates and keep Power Apps running smoothly.

Value creation is our calling.

The future of IT delivery is experience-driven and outcome-focused. When we combine the two, we create incredible value. Threadfin continuously improves the digital experience for employees and their customers to create happier, faster, smarter and safer ways of getting work done every day.
