

## GOOGLE WORKSPACE SERVICES

Secure, governed execution for modern collaboration

Google Workspace can modernize collaboration, simplify operations and improve how teams work together—but successful adoption depends on more than licensing.

Threadfin helps organizations migrate, secure and operationalize Google Workspace environments with governance, security and readiness built in from the start.

Google Workspace migrations aren't just technical projects. Success depends on governance, security & long-term operational support.

### What we help with

#### Migration & modernization

- Google Workspace migrations & tenant consolidations
- Microsoft 365 to Google Workspace transitions
- Email, calendar & file migrations
- Hybrid & coexistence planning
- User onboarding & rollout coordination

#### Security & governance

- Identity, MFA & access management
- Security baseline configuration
- Data retention & sharing controls
- Admin governance & policy alignment
- Compliance-aware implementation guidance

#### Operational readiness

- Google Drive & collaboration structure
- Shared drive governance
- Documentation & operational handoff
- End-user readiness & adoption support
- Ongoing optimization & support guidance

### What makes us different

**Services-only execution.** No licensing or hardware sales. Recommendations stay focused on operational fit & delivery quality.

**Senior-only engineering.** Critical-path work is executed by experienced infrastructure, cloud & security engineers.

**Governance, security & readiness built in.** We prioritize how environments are delivered, adopted, managed & supported long after go-live.

### Engagement Options

**Professional services execution:** End-to-end migration, configuration & modernization engagements.

**Fixed-fee assessments & QuickStarts:** Low-risk engagements with clear next steps & defined outcomes.

**Expert Access retainers:** Ongoing access to senior engineering expertise for continuity & optimization.

**White-label partner delivery:** Senior engineering execution for partners needing scalable delivery support without channel conflict.

## Collaboration is our north star.

Complex IT work succeeds when teams operate with shared context and trust. Threadfin's engineers are engaged from the start and collaborate closely with customers and partners throughout delivery. We share knowledge so teams understand not just what was built, but why—and are prepared to run it.
