

AI Agent Development QuickStart

Deploy practical AI agents in as little as 4 weeks to improve productivity, automate repetitive work, strengthen operations and unlock value from your existing knowledge and data. Platform-neutral, we help you select and build on the solution that fits your environment and goals.

Microsoft Copilot Studio | Azure OpenAI | Anthropic Claude
· OpenAI/ChatGPT | Google Gemini | and more

What's included

- Production-ready AI agent(s) deployed in your environment
- Up to 2 data source integrations per agent
- Platform selection, configuration & deployment
- Prompt engineering & agent tuning
- Testing & user validation
- User training & knowledge transfer
- Documentation & handoff

Engagement snapshot

- 01** Select agent type, evaluate platforms, connect data sources
- 02** Build & configure agent on selected platform
- 03** Test, refine & validate responses
- 04** Deploy, train users, deliver documentation

What you'll achieve

Faster time to value: Deploy AI agents in approximately 4 weeks with a structured engagement focused on practical business outcomes.

Platform confidence: Objective evaluation ensures you build on the platform that best fits your environment.

Reduced risk: Validate architecture, integrations, prompts & conversation flows before go-live.

Internal capability: Your team is equipped to manage & extend agents independently.

Start with one agent or bundle multiple.

Begin with a single high-impact agent & expand as your team builds confidence.

Popular agent types

Start with one of our most popular AI agents or work with us to build a custom solution.

KNOWLEDGE AGENT

Turn company knowledge into instant answers by searching approved content sources.

- Policies & procedures
- Product & technical documentation
- Internal knowledge bases

SECURITY AGENT

Improve security response & policy adherence through intelligent assistance.

- Security policy lookup
- Incident response guidance
- Compliance support
- Security awareness assistance

IT HELP DESK AGENT

Reduce ticket volume & improve response times through intelligent self-service assistance.

- Answer common IT questions
- Guide troubleshooting workflows
- Escalate complex issues

WORKFLOW AGENT

Automate repetitive tasks & streamline business processes across teams & systems.

- Collect required information & triage
- Trigger business workflows & route requests automatically
- Track process completion

ANALYTICS AGENT

Transform business data into actionable insights through natural language interaction.

- Answer business questions & support decision making
- Summarize reports & dashboards
- Explain trends & metrics

Don't see your use case?

We work with you to scope a custom agent tailored to your workflows, data sources & platform.
